Subject index

Volume 173/174 (1995)

Acid leaching; Dissolution; Uranium; Thorium; Activity ratio 173, 313

Actinides; Determination; Chromatography; Environmental 173, 19

Activity ratio; Dissolution; Acid leaching; Uranium; Thorium 173, 313

Adsorbent resin; Sr; Sorption; Milk; Radioactive tracing 173, 159

Air particulates; Volatile organic compounds (VOC); Fly-ash; Hungary 173, 283

Alpha-spectrometry; Natural radionuclides; Drinking water; Gamma-spectrometry 173, 91

Analysis; Water; Lead-210; Bismuth-210 173, 117

Analytical methods; ^{210}Pb ; ^{210}Po 173, 23

Ancient ceramics; Provenance studies; INAA (instrumental neutron activation analysis); Concentration fingerprint 173, 345

Aqueous solutions; Zeoliferous rocks; Thorium; Uranium; Uptake processes; Microporous minerals; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

Assay; Cerenkov; ^{226}Ra ; Water 173, 53

Beta proportional counting; Radiocaesium and radoruthenium; Determination; Foodstuffs 173, 169

Beta spectrometry; Cerenkov radiation; $^{90}\text{Sr}/\text{Y}$ 173, 225

Bioavailability; Polonium; Chemical form 173, 151

Biological indicator; Radioactive contamination; Moss; Lichen; Radionuclide transfer 173, 369

Bismuth-210; Analysis; Water; Lead-210 173, 117

Bovine muscle tissue; ^{14}C labelling; Homogenization; Freeze-drying 173, 275

Brazil; Radionuclide analysis; Environmental samples; National intercomparison programs 173, 15

^{14}C labelling; Bovine muscle tissue; Homogenization; Freeze-drying 173, 275

Carbon-14; Sulphur-35; Tritium; Deposition; Vegetation 173, 399

Cation exchange; Radioisotopes; Uptake 173, 301

Cerenkov; Assay; ^{226}Ra ; Water 173, 53

Cesium; Rubidium; Potassium; Norway spruce; *Picea abies*; Needle; Soil 173, 361

Chemical form; Polonium; Bioavailability 173, 151

Chemical industry; Phosphate fertiliser; Phosphoric acid; Phosphogypsum; Natural radioactivity 173, 125

Cherenkov radiation; Beta spectrometry; $^{90}\text{Sr}/\text{Y}$ 173, 225

Chernobyl; Sellafield; Radiocaesium; Radioactivity; Isle of Man 173, 7

Chernobyl fallout; Tree rings; Spruce; Radionuclides 173, 393

Chromatography; Actinides; Determination; Environmental 173, 19

Cluster analysis; River Nile, water quality; Egypt; INAA 173, 69

Coal-fired power plants; Nuclear activation analysis; Radionuclides; Pollution; Trace element 173, 339

- Concentration fingerprint**; Ancient ceramics; Provenance studies; INAA (instrumental neutron activation analysis) 173, 345
- Deposition**; Carbon-14; Sulphur-35; Tritium; Vegetation 173, 399
- Determination**; Actinides; Chromatography; Environmental 173, 19
- Determination**; Radiocaesium and radoruthenium; Foodstuffs; Beta proportional counting 173, 169
- Dissolution**; Acid leaching; Uranium; Thorium; Activity ratio 173, 313
- Drinking water**; Natural radionuclides; Alpha-spectrometry; Gamma-spectrometry 173, 91
- Egypt**; River Nile, water quality; INAA; Cluster analysis 173, 69
- β -emitter**; Ion chromatography; Liquid scintillation; α -emitter 173, 231
- α -emitter**; Ion chromatography; Liquid scintillation; β -emitter 173, 231
- α -emitters**; Liquid scintillation spectrometry; Environmental measurement; Tritium; Krypton-85; Strontium-90 173, 29
- Environmental**; Actinides; Determination; Chromatography 173, 19
- Environmental**; Isotope dilution; ICP-MS; Technetium-99; Iodine-129; Tritium 173, 101
- Environmental**; Radioactivity; Intercomparison; Gamma-rays 173, 247
- Environmental materials**; Neutron activation analysis; Quality control 173, 1
- Environmental measurement**; Liquid scintillation spectrometry; α -emitters; Tritium; Krypton-85; Strontium-90 173, 29
- Environmental radioactivity**; Homogeneity test; Reference materials; γ -Ray spectrometry 173, 267
- Environmental radioactivity**; Nuclear facilities; Radionuclide; *Helix aspersa*; Gamma spectrometry; Uranium ore 173, 41
- Environmental samples**; Radionuclide analysis; National intercomparison programs; Brazil 173, 15
- Fertilizer industries**; Radionuclide pollution; Uranium (U); Thorium (Th); River sediments 173, 203
- Field study**; Tritium migration; Groundwater; Radioactive nuclide 173, 47
- Fly-ash**; Volatile organic compounds (VOC); Air particulates; Hungary 173, 283
- Foodstuffs**; Radiocaesium and radoruthenium; Determination; Beta proportional counting 173, 169
- Forest ecosystem**; 30-km zone; Radionuclide uptake 173, 375
- Freeze-drying**; Bovine muscle tissue; ^{14}C labelling; Homogenization 173, 275
- Gamma counting**; Lucas cell counting; Radon; Liquid scintillation counting 173, 61
- Gamma spectrometry**; Environmental radioactivity; Nuclear facilities; Radionuclide; *Helix aspersa*; Uranium ore 173, 41
- Gamma-rays**; Environmental; Radioactivity; Intercomparison 173, 247
- Gamma-spectrometry**; Natural radionuclides; Drinking water; Alpha-spectrometry 173, 91
- Glaciers**; Radioactivity measurements; Lake sediments 173, 211
- Groundwater**; Field study; Tritium migration; Radioactive nuclide 173, 47
- Heavy metals**; Neutron activation analysis; Indoor air 173, 323
- Helix aspersa***; Environmental radioactivity; Nuclear facilities; Radionuclide; Gamma spectrometry; Uranium ore 173, 41
- Hemodialysis**; Radiocaesium; Peritoneal dialysis 173, 407
- Homogeneity test**; Reference materials; γ -Ray spectrometry; Environmental radioactivity 173, 267
- Homogenization**; Bovine muscle tissue; ^{14}C labelling; Freeze-drying 173, 275
- Hungary**; Volatile organic compounds (VOC); Air particulates; Fly-ash 173, 283
- Hyphan**; Uranium, rapid detection; Uranium, natural waters 173, 83
- ^{129}I** ; Milk; Neutron flux; Irradiation 173, 351
- ICP-MS**; Isotope dilution; Technetium-99; Iodine-129; Tritium; Environmental 173, 101
- INAA (instrumental neutron activation analysis)**; Ancient ceramics; Provenance studies; Concentration fingerprint 173, 345
- INAA**; River Nile, water quality; Egypt; Cluster analysis 173, 69

Indoor air; Neutron activation analysis; Heavy metals 173, 323

Instrumental neutron activation analysis (INAA); Zeoliferous rocks; Thorium; Uranium; Aqueous solutions; Uptake processes; Microporous minerals; X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

Intercomparison; Environmental; Radioactivity; Gamma-rays 173, 247

Iodine-129; Isotope dilution; ICP-MS; Technetium-99; Tritium; Environmental 173, 101

Ion chromatography; Liquid scintillation; α -emitter; β -emitter 173, 231

Ion-chromatography; Milk; Strontium-90; Yttrium-90 173, 179

Irish Sea; Phosphogypsum; U-series radionuclides 173, 137

Irradiation; Milk; ^{129}I ; Neutron flux 173, 351

Isle of Man; Chernobyl; Sellafield; Radiocaesium; Radioactivity 173, 7

Isotope dilution; ICP-MS; Technetium-99; Iodine-129; Tritium; Environmental 173, 101

Krypton-85; Liquid scintillation spectrometry; Environmental measurement; α -emitters; Tritium; Strontium-90 173, 29

Laboratory Study; Sorption; Radiotracer; Thorium; Radiocolloid 173, 259

Lake sediments; Radioactivity measurements; Glaciers 173, 211

Lead-210; Analysis; Water; Bismuth-210 173, 117

Lichen; Biological indicator; Radioactive contamination; Moss; Radionuclide transfer 173, 369

Liquid scintillation; Ion chromatography; α -emitter; β -emitter 173, 231

Liquid scintillation counting; Lucas cell counting; Radon; Gamma counting 173, 61

Liquid scintillation spectrometry; Environmental measurement; α -emitters; Tritium; Krypton-85; Strontium-90 173, 29

Lucas cell counting; Radon; Gamma counting; Liquid scintillation counting 173, 61

Mediterranean Sea; Plutonium concentration; Sediment core; Nuclear industry; Sedimentation process 173, 187

Microorganisms; Thorium-complexing capacity; Particulate uranium; Strong organic ligand 173, 195

Microporous minerals; Zeoliferous rocks; Thorium; Uranium; Aqueous solutions; Uptake processes; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

Milk; ^{129}I ; Neutron flux; Irradiation 173, 351

Milk; Sr; Sorption; Radioactive tracing; Adsorbent resin 173, 159

Milk; Strontium-90; Yttrium-90; Ion-chromatography 173, 179

Moss; Biological indicator; Radioactive contamination; Lichen; Radionuclide transfer 173, 369

National intercomparison programs; Radionuclide analysis; Environmental samples; Brazil 173, 15

Natural radioactivity; Phosphate fertiliser; Chemical industry; Phosphoric acid; Phosphogypsum 173, 125

Natural radionuclides; Drinking water; Alpha-spectrometry; Gamma-spectrometry 173, 91

Needle; Cesium; Rubidium; Potassium; Norway spruce; *Picea abies*; Soil 173, 361

Neutron activation analysis; Environmental materials; Quality control 173, 1

Neutron activation analysis; Heavy metals; Indoor air 173, 323

Neutron flux; Milk; ^{129}I ; Irradiation 173, 351

Norway spruce; Cesium; Rubidium; Potassium; *Picea abies*; Needle; Soil 173, 361

Nuclear activation analysis; Coal-fired power plants; Radionuclides; Pollution; Trace element 173, 339

Nuclear facilities; Environmental radioactivity; Radionuclide; *Helix aspersa*; Gamma spectrometry; Uranium ore 173, 41

Nuclear industry; Plutonium concentration; Sediment core; Mediterranean Sea; Sedimentation process 173, 187

Particulate uranium; Thorium-complexing capacity; Microorganisms; Strong organic ligand 173, 195

^{210}Pb ; ^{210}Po ; Analytical methods 173, 23

Peritoneal dialysis; Radiocaesium; Hemodialysis 173, 407

Phosphate fertiliser; Chemical industry; Phosphoric acid; Phosphogypsum; Natural radioactivity 173, 125

- Phosphogypsum**; Phosphate fertiliser; Chemical industry; Phosphoric acid; Natural radioactivity 173, 125
- Phosphogypsum**; U-series radionuclides; Irish Sea 173, 137
- Phosphoric acid**; Phosphate fertiliser; Chemical industry; Phosphogypsum; Natural radioactivity 173, 125
- Picea abies***; Cesium; Rubidium; Potassium; Norway spruce; Needle; Soil 173, 361
- Plutonium concentration**; Sediment core; Mediterranean Sea; Nuclear industry; Sedimentation process 173, 187
- ^{210}Po ; ^{210}Pb** ; Analytical methods 173, 23
- Pollution**; Coal-fired power plants; Nuclear activation analysis; Radionuclides; Trace element 173, 339
- Polonium**; Bioavailability; Chemical form 173, 151
- Potassium**; Cesium; Rubidium; Norway spruce; *Picea abies*; Needle; Soil 173, 361
- Provenance studies**; Ancient ceramics; INAA (instrumental neutron activation analysis); Concentration fingerprint 173, 345
- Quality control**; Environmental materials; Neutron activation analysis 173, 1
- ^{226}Ra** ; Cerenkov; Assay; Water 173, 53
- Radioactive contamination**; Biological indicator; Moss; Lichen; Radionuclide transfer 173, 369
- Radioactive nuclide**; Field study; Tritium migration; Ground-water 173, 47
- Radioactive tracing**; Sr; Sorption; Milk; Adsorbent resin 173, 159
- Radioactivity**; Chernobyl; Sellafield; Radiocaesium; Isle of Man 173, 7
- Radioactivity**; Environmental; Intercomparison; Gamma-rays 173, 247
- Radioactivity measurements**; Glaciers; Lake sediments 173, 211
- Radiocaesium**; Chernobyl; Sellafield; Radioactivity; Isle of Man 173, 7
- Radiocaesium**; Hemodialysis; Peritoneal dialysis 173, 407
- Radiocaesium and rutherenium**; Determination; Foodstuffs; Beta proportional counting 173, 169
- Radiochemical separation**; Rhenium; Ruthenium; Yield monitor 173, 293
- Radiocolloid**; Sorption; Radiotracer; Laboratory Study; Thorium 173, 259
- Radioisotopes**; Uptake; Cation exchange 173, 301
- Radionuclide**; Environmental radioactivity; Nuclear facilities; *Helix aspersa*; Gamma spectrometry; Uranium ore 173, 41
- Radionuclide analysis**; Environmental samples; National inter-comparison programs; Brazil 173, 15
- Radionuclide pollution**; Uranium (U); Thorium (Th); River sediments; Fertilizer industries 173, 203
- Radionuclide transfer**; Biological indicator; Radioactive contamination; Moss; Lichen 173, 369
- Radionuclide uptake**; 30-km zone; Forest ecosystem 173, 375
- Radionuclides**; Coal-fired power plants; Nuclear activation analysis; Pollution; Trace element 173, 339
- Radionuclides**; Transfer; Vegetables; Reclaimed land 173, 385
- Radionuclides**; Tree rings; Spruce; Chernobyl fallout 173, 393
- Radiotracer**; Sorption; Laboratory Study; Thorium; Radiocolloid 173, 259
- Radon**; Lucas cell counting; Gamma counting; Liquid scintillation counting 173, 61
- γ -Ray spectrometry**; Homogeneity test; Reference materials; Environmental radioactivity 173, 267
- Reclaimed land**; Radionuclides; Transfer; Vegetables 173, 385
- Reference materials**; Homogeneity test; γ -Ray spectrometry; Environmental radioactivity 173, 267
- Rhenium**; Ruthenium; Yield monitor; Radiochemical separation 173, 293
- River Nile, water quality**; Egypt; INAA; Cluster analysis 173, 69
- River sediments**; Radionuclide pollution; Uranium (U); Thorium (Th); Fertilizer industries 173, 203
- Rubidium**; Cesium; Potassium; Norway spruce; *Picea abies*; Needle; Soil 173, 361
- Ruthenium**; Rhenium; Yield monitor; Radiochemical separation 173, 293

Scanning electron microscopy (SEM); Zeoliferous rocks; Thorium; Uranium; Aqueous solutions; Uptake processes; Microporous minerals; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF) 173, 237

Sediment core; Plutonium concentration; Mediterranean Sea; Nuclear industry; Sedimentation process 173, 187

Sedimentation process; Plutonium concentration; Sediment core; Mediterranean Sea; Nuclear industry 173, 187

Sellafield; Chernobyl; Radiocaesium; Radioactivity; Isle of Man 173, 7

Soil; Cesium; Rubidium; Potassium; Norway spruce; *Picea abies*; Needle 173, 361

Sorption; Radiotracer; Laboratory Study; Thorium; Radiocolloid 173, 259

Sorption; Sr; Milk; Radioactive tracing; Adsorbent resin 173, 159

Spruce; Tree rings; Radionuclides; Chernobyl fallout 173, 393

Sr; Sorption; Milk; Radioactive tracing; Adsorbent resin 173, 159

⁹⁰Sr/Y; Beta spectrometry; Cherenkov radiation 173, 225

Strong organic ligand; Thorium-complexing capacity; Particulate uranium; Microorganisms 173, 195

Strontium-90; Liquid scintillation spectrometry; Environmental measurement; α -emitters; Tritium; Krypton-85 173, 29

Strontium-90; Milk; Yttrium-90; Ion-chromatography 173, 179

Sulphur-35; Carbon-14; Tritium; Deposition; Vegetation 173, 399

Technetium-99; Isotope dilution; ICP-MS; Iodine-129; Tritium; Environmental 173, 101

Thorium (Th); Radionuclide pollution; Uranium (U); River sediments; Fertilizer industries 173, 203

Thorium; Dissolution; Acid leaching; Uranium; Activity ratio 173, 313

Thorium; Sorption; Radiotracer; Laboratory Study; Radiocolloid 173, 259

Thorium; Zeoliferous rocks; Uranium; Aqueous solutions; Uptake processes; Microporous minerals; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

Thorium-complexing capacity; Particulate uranium; Microorganisms; Strong organic ligand 173, 195

Trace element; Coal-fired power plants; Nuclear activation analysis; Radionuclides; Pollution 173, 339

Transfer; Radionuclides; Vegetables; Reclaimed land 173, 385

Tree rings; Spruce; Radionuclides; Chernobyl fallout 173, 393

Tritium; Carbon-14; Sulphur-35; Deposition; Vegetation 173, 399

Tritium; Isotope dilution; ICP-MS; Technetium-99; Iodine-129; Environmental 173, 101

Tritium; Liquid scintillation spectrometry; Environmental measurement; α -emitters; Krypton-85; Strontium-90 173, 29

Tritium migration; Field study; Groundwater; Radioactive nuclide 173, 47

U-series radionuclides; Phosphogypsum; Irish Sea 173, 137

Uptake; Radioisotopes; Cation exchange 173, 301

Uptake processes; Zeoliferous rocks; Thorium; Uranium; Aqueous solutions; Microporous minerals; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

Uranium (U); Radionuclide pollution; Thorium (Th); River sediments; Fertilizer industries 173, 203

Uranium; Dissolution; Acid leaching; Thorium; Activity ratio 173, 313

Uranium; Zeoliferous rocks; Thorium; Aqueous solutions; Uptake processes; Microporous minerals; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

Uranium ore; Environmental radioactivity; Nuclear facilities; Radionuclide; *Helix aspersa*; Gamma spectrometry 173, 41

Uranium, natural waters; Uranium, rapid detection; Hyphan 173, 83

Uranium, rapid detection; Uranium, natural waters; Hyphan 173, 83

Vegetables; Radionuclides; Transfer; Reclaimed land 173, 385

Vegetation; Carbon-14; Sulphur-35; Tritium; Deposition 173, 399

Volatile organic compounds (VOC); Air particulates; Fly-ash; Hungary 173, 283

Water; Analysis; Lead-210; Bismuth-210 173, 117

Water; Cerenkov; Assay; ^{226}Ra 173, 53

X-ray fluorescence (XRF); Zeoliferous rocks; Thorium; Uranium; Aqueous solutions; Uptake processes; Microporous minerals; Instrumental neutron activation analysis (INAA); Scanning electron microscopy (SEM) 173, 237

Yield monitor; Rhenium; Ruthenium; Radiochemical separation 173, 293

Yttrium-90; Milk; Strontium-90; Ion-chromatography 173, 179

Zeoliferous rocks; Thorium; Uranium; Aqueous solutions; Uptake processes; Microporous minerals; Instrumental neutron activation analysis (INAA); X-ray fluorescence (XRF); Scanning electron microscopy (SEM) 173, 237

30-km zone; Radionuclide uptake; Forest ecosystem 173, 375
